CALLAS in Art and Entertainment Applications

Multimodal Interfaces aim to achieve the highest level of naturalness in Human-Computer interaction. CALLAS (Conveying Affectiveness in Leading-edge Living Adaptive Systems) will investigate and advance the state of the art to develop a comprehensive user experience in Digital Arts and Entertainment systems. CALLAS will enhance the understanding of basic emotional interaction and develop corresponding levels of Multimodal processing.

An Integrated Approach

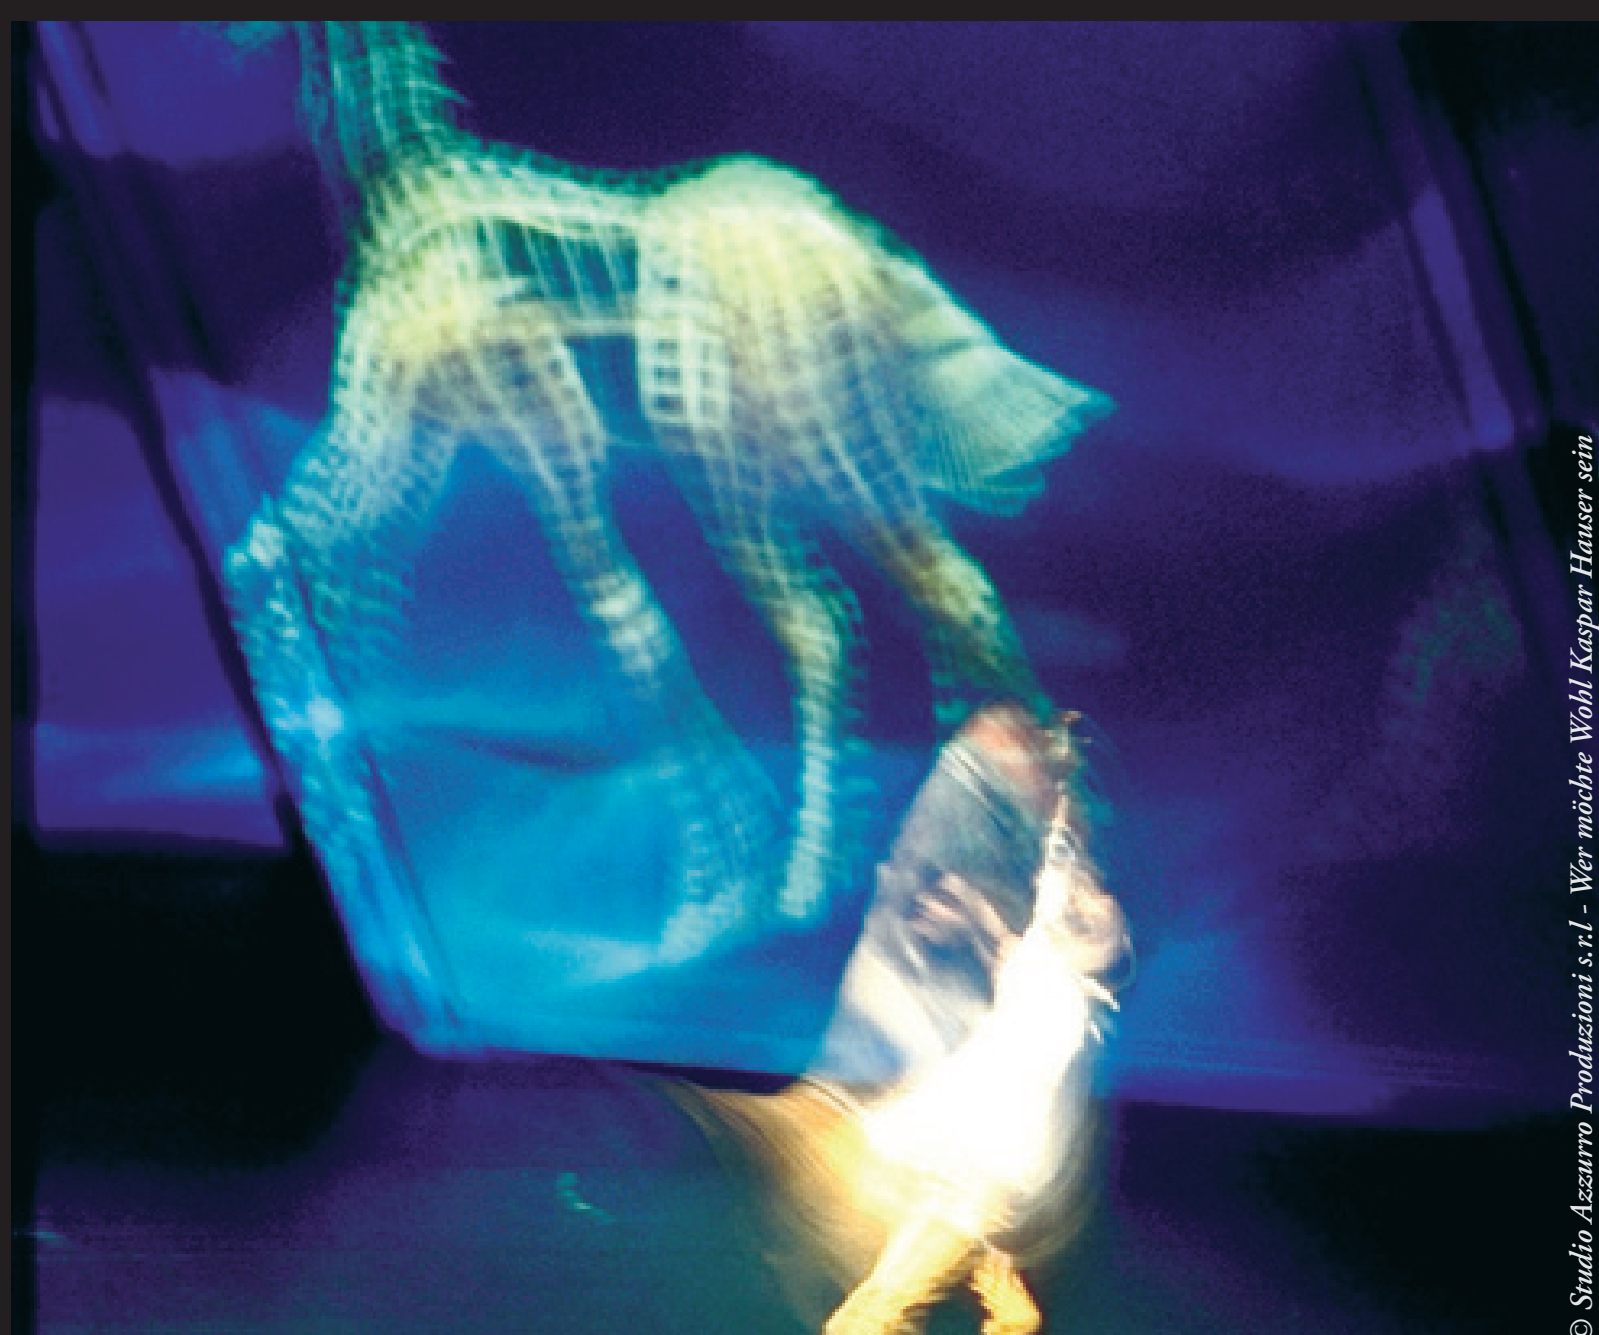

CALLAS is an Integrated Project co-financed by the European Union within the Sixth Framework Programme designed to address significant technological and scientific objectives in terms of both technical sophistication and digital content. By advancing the current state of the art technology in digital arts and entertainment, and collaborating with international people and organizations, CALLAS will develop technologies to advance and go beyond basic emotional models, extend emotional synthesis, and develop multimodal affective applications.

Connect to CALLAS

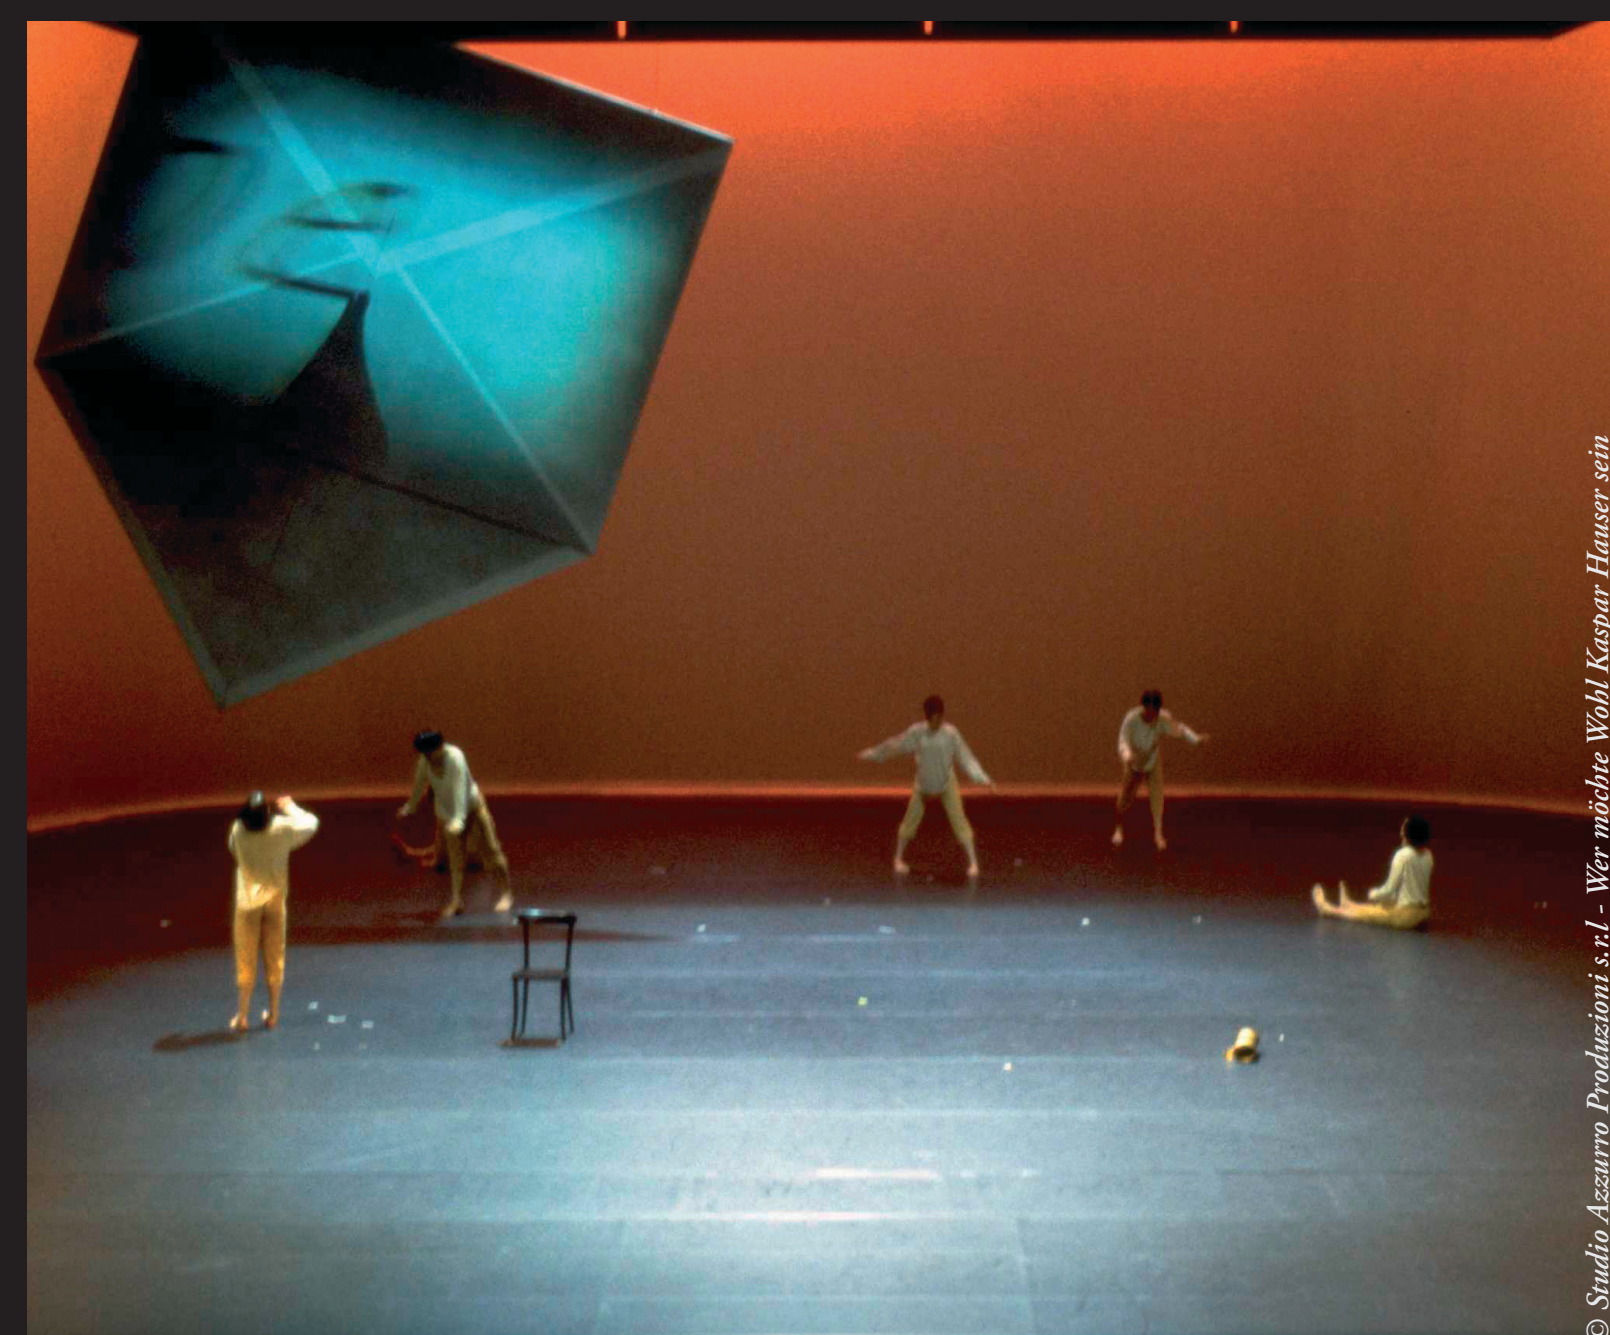

The CALLAS User Community is a network of professionals and institutions with an interest in advancing project initiatives and goals. By registering as a member in the community you will have access to CALLAS technologies both aimed at application providers and final users. Members also take advantage of the CALLAS website to keep in touch with project news, on-line forums, document uploading and downloading, demonstration videos, and trial version downloading. Visit the CALLAS website today to get involved with state of the art Information Technologies in New Media and digital arts, collaborate with international professionals and institutions, and promote the basis for leading strategies.
